INTERIM REVIEW REPORT ON INTERIM FINANCIAL INFORMATION

(Convenience translation of the independent auditor's report originally issued in Turkish, See Note I.b of Section three)

To the Board of Directors of Akbank T.A.Ş.;

Introduction

We have reviewed the unconsolidated balance sheet of Akbank T.A.Ş. ("the Bank") at 30 September 2015 and the related unconsolidated income statement, unconsolidated statement of income and expense items under shareholders' equity, unconsolidated statement of changes in shareholders' equity, unconsolidated statement of cash flows and a summary of significant accounting policies and other explanatory notes to the unconsolidated financial statements for the nine-month-period then ended. The Bank Management is responsible for the preparation and fair presentation of interim financial statements in accordance with the "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by Banking Regulation and Supervision Authority, (together referred as BRSA Accounting and Reporting Legislation) and Turkish Accounting Standard 34 "Interim Financial Reporting" except for the matters regulated by BRSA Legislation. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, "Limited Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit performed in accordance with the Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an opinion.

Basis of Qualified Conclusion

Subsequent to the reversal of TL 70.000 thousands during the year 2014, the accompanying unconsolidated financial statements as at 30 September 2015 include a general reserve amounting to TL 200.000 thousands which is fully provided in 2013 by the Bank management for the possible results of the circumstances which may arise from any changes in the economy and market conditions.

Qualified Conclusion

Based on our review, except for the effect of the matter referred in the 'basis of qualified conclusion paragraph' on the unconsolidated financial statements, nothing has come to our attention that causes us to believe that the accompanying unconsolidated financial statements do not give a true view of the financial position of Akbank T.A.Ş. at 30 September 2015 and of the results of its operations and its cash flows for the nine-month-period then ended in all aspects in accordance with the "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by Banking Regulation and Supervision Authority, (together referred as BRSA Accounting and Reporting Legislation) and Turkish Accounting Standard 34 "Interim Financial Reporting" except for the matters regulated by BRSA Legislation.

Additional paragraph for convenience translation to English:

As explained in detail in Note I.b. of Section Three, the effects of differences between accounting principles and standards set out by regulations in conformity with BRSA Accounting and Reporting Legislation) and Turkish Accounting Standard 34 "Interim Financial Reporting" except for the matters regulated by BRSA Legislation, accounting principles generally accepted in countries in which the accompanying unconsolidated financial statements are to be distributed and International Financial Reporting Standards ("IFRS") have not been quantified in the accompanying unconsolidated financial statements. Accordingly, the accompanying unconsolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

AKBANK T.A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AT 30 SEPTEMBER 2015

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

**SECTION THREE
ACCOUNTING POLICIES**

I. EXPLANATIONS ON BASIS OF PRESENTATION:

a. The preparation of the financial statements and related notes and explanations in accordance with the Turkish Accounting Standards and Regulation on the Principles and Procedures numbered 5411 Regarding Banks' Accounting Application and Keeping Documents:

The unconsolidated financial statements are prepared within the scope of the "Regulation on Accounting Applications for Banks and Safeguarding of Documents" related with Banking Act numbered 5411 published in the Official Gazette no.26333 dated 1 November 2006 and in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by the Banking Regulation and Supervision Agency ("BRSA"), and in case where a specific regulation is not made by BRSA, "Turkish Accounting Standards" ("TAS") and "Turkish Financial Reporting Standards" ("TFRS") and related appendices and interpretations put into effect by Public Oversight Accounting and Auditing Standards Authority ("POA"). The format and content of the publicly announced unconsolidated financial statements and notes to these statements have been prepared in accordance with the "Communiqué on Publicly Announced Financial Statements, Explanations and Notes to These Financial Statements", published in Official Gazette no. 28337, dated 28 June 2012, and amendments to this Communiqué. The Bank maintains its books in Turkish Lira in accordance with the Banking Act, Turkish Commercial Code and Turkish Tax Legislation.

The unconsolidated financial statements have been prepared in TL, under the historical cost convention except for the financial assets and liabilities carried at fair value.

The preparation of unconsolidated financial statements in conformity with TAS requires the use of certain critical accounting estimates by the Bank management to exercise its judgment on the assets and liabilities of the balance sheet and contingent issues as of the balance sheet date. These estimates, which include the fair value calculations of financial instruments and impairments of financial assets are being reviewed regularly and, when necessary, suitable corrections are made and the effects of these corrections are reflected to the income statement. Assumptions and estimates that are used in the preparation of the accompanying financial statements are explained in the following related disclosures.

The amendments of TAS and TFRS which have entered into force as of 1 January 2015 have no material impact on the Bank's accounting policies, financial position and performance. The amendments of TAS and TFRS, except TFRS 9 Financial Instruments and TAS 27 Separate Financial Statements, which have been published as of reporting date but have not been effective yet, will have no impact on the accounting policies, financial condition and performance of the Bank. The Bank assesses the impact of TFRS 9 Financial Instruments standard.

b. Explanation for convenience translation into English:

The differences between accounting principles, as described in these preceding paragraphs and accounting principles generally accepted in countries in which unconsolidated financial statements are to be distributed and International Financial Reporting Standards ("IFRS") have not been quantified in these unconsolidated financial statements. Accordingly, these unconsolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

c. Accounting policies and valuation principles applied in the presentation of unconsolidated financial statements:

The accounting policies and valuation principles applied in the preparation of unconsolidated financial statements, are determined and applied in accordance with regulations, communiqués, explanations and circulars on accounting and financial reporting principles published by the BRSA, and in case where there is no special regulation made by the BRSA, in accordance with principles in the context of TAS and TFRS, and are consistent with the accounting policies applied in the annual financial statements of the year ended 31 December 2014. The aforementioned accounting policies and valuation principles are explained in Notes II to XXVIII below.

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

II. EXPLANATIONS ON STRATEGY OF USING FINANCIAL INSTRUMENTS AND EXPLANATIONS IN FOREIGN CURRENCY TRANSACTIONS:

The Bank's core business activities include consumer and private banking, commercial banking, SME banking, corporate and investment banking, foreign exchange, money markets, securities transactions (Treasury transactions) and international banking services. By nature, the Bank's activities are principally related to the use of financial instruments. As the main funding source, the Bank accepts deposits from customers for various periods and invests these funds in high quality assets with high interest margins. Other than deposits, the Bank's most important funding sources are equity, marketable securities issued, money market borrowings and mostly borrowings from foreign financial institutions. The Bank follows an asset-liability management strategy that mitigates risk and increases earnings by balancing the funds borrowed and the investments in various financial assets. The main objective of asset-liability management is to limit the Bank's exposure to liquidity risk, interest rate risk, currency risk and credit risk while increasing profitability and strengthening the Bank's equity. The Asset-Liabilities Committee ("ALCO") manages the assets and liabilities within the trading limits on the level of exposure placed by the Executive Market Risk Committee.

Foreign currency denominated monetary assets and liabilities are translated with the exchange rates prevailing at the balance sheet date. Gains and losses arising from such transactions are recognized in the income statement under the account of "Net foreign exchange income/expense". Foreign currency denominated subsidiaries, which are accounted with acquisition cost method, are translated with the foreign exchange rates prevailing at the acquisition date.

As of 30 September 2015, foreign currency denominated balances are translated into TL using the exchange rates of TL 2,9800, TL 3,3435 and TL 2,4740 for USD, EURO and Yen respectively.

III. EXPLANATIONS ON INVESTMENTS IN ASSOCIATES AND SUBSIDIARIES:

Investments in associates and subsidiaries are accounted in accordance with the "Turkish Accounting Standard on Separate Financial Statements" ("TAS 27") in the unconsolidated financial statements and measured in the financial statements with their costs. Dividends are recognized in the income statement when the right to receive the dividend is obtained.

IV. EXPLANATIONS ON FORWARD TRANSACTIONS AND DERIVATIVE INSTRUMENTS:

The major derivative instruments utilized by the Bank are currency and interest rate swaps, cross currency swaps, currency options and currency forwards.

The Bank classifies its derivative instruments as "Held-for-hedging" or "Held-for-trading" in accordance with "Turkish Accounting Standard for Financial Instruments: Recognition and Measurement" ("TAS 39"). In accordance with TAS 39, although certain derivative transactions provide effective economic hedges under the Bank's risk management position, in accordance with TAS 39 they are treated as derivatives "Held-for-trading".

Payables and receivables arising from the derivative instruments are followed in the off-balance sheet accounts at their contractual values.

Derivative instruments are remeasured at fair value after initial recognition. In accordance with the classification of the derivative instrument, if the fair value of a derivative financial instrument is positive, it is recorded to the account "Trading derivative financial assets" or "Hedging derivative financial assets"; if the fair value difference is negative, it is recorded to "Trading derivative financial liabilities" or "Hedging derivative financial liabilities". Differences in the fair value of trading derivative instruments are accounted as income/loss from derivative financial transactions under "trading income/loss" item in the income statement. The basis on accounting of derivative instruments for hedging purposes are explained Note XII of Section Four. The fair values of the derivative financial instruments are calculated using quoted market prices or by using discounted cash flow models.

An embedded derivative shall be separated from host contract only if:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid (combined) instrument is not measured at fair value with changes in fair value recognised in profit or loss

If an embedded derivative is separated, the host contract shall be accounted for under IAS 39 if it is a financial instrument, and in accordance with other appropriate Standards if it is not a financial instrument.

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

V. EXPLANATIONS ON INTEREST INCOME AND EXPENSE:

Interest income and expenses are recognized in the income by using the "Effective interest method". The Bank ceases accruing interest income on non-performing loans and reverses any interest income accrued from such loans. No income is accounted until the collection is made according to the related regulation.

VI. EXPLANATIONS ON FEE AND COMMISSION INCOME AND EXPENSES:

Fees and commission income/expenses are primarily recognized on an accrual basis or "Effective interest method" according to the nature of the fee and commission, except for certain commission income and fees for various banking services which are recorded as income at the time of collection. Contract based fees or fees received for services such as the purchase and sale of assets on behalf of a third party or legal person are recognized as income at the time of collection.

VII. EXPLANATIONS ON FINANCIAL ASSETS:

The Bank categorizes its financial assets as "Fair value through profit/loss", "Available-for-sale", "Loans and receivables" or "Held-to-maturity". Sale and purchase transactions of the financial assets mentioned above are recognized and derecognized at the "Settlement dates". The appropriate classification of financial assets of the Bank is determined at the time of purchase by the Bank management, taking into consideration the purpose of the investment.

a. Financial assets at the fair value through profit or loss:

This category has two subcategories: "Trading financial assets" and "Financial assets designated at fair value through profit/loss at initial recognition".

Trading financial assets are financial assets which are either acquired for generating a profit from short-term fluctuations in prices or are financial assets included in a portfolio aimed at short-term profit making. All regular way purchases and sales of trading financial assets are recognized at the settlement date, which is the date that the asset is delivered to/from the Bank. Trading financial assets are initially recognized at fair value and remeasured at their fair value after recognition. All gains and losses arising from these valuations are reflected in the income statement. Interest earned while holding trading financial assets is accounted as interest income and dividends received are included separately in dividend income.

Derivative financial assets are classified as trading financial assets unless they are used for hedging purposes. The accounting of derivative financial assets is explained in Note IV of Section Three.

The Bank has no financial assets designated as financial assets at fair value through profit or loss.

b. Financial assets available-for-sale:

Financial assets available-for-sale consist of financial assets other than "Loans and receivables", "Held-to-maturity", "Financial assets at fair value through profit or loss" and non-derivative financial assets. Financial assets available-for-sale are recorded by adding transaction cost to acquisition cost reflecting the fair value of the financial asset.

After the recognition, financial assets available-for-sale are remeasured at fair value. Interest income arising from available-for-sale calculated with "Effective interest method" and dividend income from equity securities are reflected to income statement. "Unrealized gains and losses" arising from the difference between the amortized cost and the fair value of securities classified as available-for-sale are recognized in the account of "Marketable securities valuation differences" under shareholders' equity, unless these assets are impaired, collected, sold, or disposed of. When these securities are collected or disposed of, the related fair value differences accumulated in the shareholders' equity are transferred to the income statement. Available-for-sale equity securities that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Available-for-sale equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

AKBANK T.A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AT 30 SEPTEMBER 2015

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

c. Loans and Receivables:

Loans and receivables are non-derivative financial assets that are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale, are unlisted in an active market and whose payments are fixed or can be determined. Loans and receivables are carried initially by adding acquisition cost which reflect fair value to transaction costs and subsequently recognized at the discounted value calculated using the "Effective interest method". The expenses incurred for the assets received as collateral are not considered as transaction costs and are recognized in the expense accounts.

If the collectability of any receivable is identified as limited or doubtful by the management through assessments and estimates, the Bank provides general and specific provisions for these loans and receivables in accordance with the "Communiqué Related to Principles and Procedures on Determining the Qualifications of Banks' Loans and Other Receivables and the Provision for These Loans and Other Receivables" published in the Official Gazette dated 1 November 2006, no.26333.If a receivable is collected which is provisioned in the same year, it is deducted from the "Special Provisions Loans and Other Receivables". Provision expenses are accounted under "Provision for Loan Losses and Other Receivables" in the income statement and deducted from the net income of the period. If a receivable is collected which is provisioned in the same year, it is deducted from the "Provision for Loan Losses and Other Receivables". If there is a subsequent collection from a receivable which has already been provisioned in previous years, the recovery amount is classified under "Other Operating Income". Uncollectible receivables are written-off after all the legal procedures are finalized.

d. Held-to-maturity financial assets:

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturity that an entity has the positive intention and ability to held-to-maturity other than those that the entity upon initial recognition designates as at fair value through profit or loss, those that the entity designates as available-for-sale; and those that meet the definition of loans and receivables. Held-to-maturity financial assets are initially recognized at acquisition cost including the transaction costs which reflect the fair value of those instruments and subsequently recognized at amortized cost by using effective interest rate method. Interest income obtained from held-to-maturity financial assets is accounted in income statement.

There are no financial assets previously classified as held-to-maturity but which cannot be subject to this classification for two years due to the contradiction of classification principles.

The Bank has Consumer Price Index ("CPI") linked government bonds under available-for-sale and held-to maturity portfolios with semi-annual fixed real coupon rates and a maturity of 5 to 10 years. These marketable securities are valued and accounted by using effective interest rate method by considering the real coupon rates and reference inflation index at the issue date together with the index calculated by considering the estimated inflation rate. As disclosed in 'Inflation Indexed Bonds Manual' published by Turkish Treasury, reference index used for the real payments is determined based on the inflation rates of two months before. The estimated inflation rate used is updated during the year when necessary.

VIII. EXPLANATIONS ON IMPAIRMENT OF FINANCIAL ASSETS:

It is assessed whether there is objective evidence for a financial asset or group of financial assets is impaired at each balance sheet date. Provision for impairment is provided when there is an objective evidence of impairment.

Impairment for held-to-maturity financial assets carried at amortized cost is calculated as the difference between the present value of the expected future cash flows discounted based on the "Effective interest method" and its carrying value. In case an impairment occurs, the impairment amount is deducted from the carrying value of the asset and the impairment loss is recognized in profit and loss. Regarding available-for-sale financial assets, when there is objective evidence that the asset is impaired the cumulative loss that had been recognized in other comprehensive income shall be reclassified from equity to profit or loss as a reclassification adjustment even though the financial asset has not been derecognized. An explanation about the impairment of loans and receivables is given in Note VII-c of Section Three.

IX. EXPLANATIONS ON OFFSETTING FINANCIAL ASSETS:

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the Bank has a legally enforceable right to offset the recognized amounts and there is an intention to collect/pay the related financial assets and liabilities on a net basis, or to realize the asset and settle the liability simultaneously.

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

X. EXPLANATIONS ON SALES AND REPURCHASE AGREEMENTS AND SECURITIES LENDING TRANSACTIONS:

Securities subject to repurchase agreements ("Repos") are classified as "Financial assets at fair value difference through profit or loss", "Available-for-sale securities" and "Held-to-maturity securities" in the balance sheet according to the investment purposes and measured according to the portfolio of the Bank to which they belong. Funds obtained under repurchase agreements are accounted under "Funds provided under repurchase agreements" in liability accounts and differences between the sale and repurchase prices determined by these repurchase agreements are accrued evenly over the life of the repurchase agreement using the "Effective interest (internal return) method".

Funds given against securities purchased under agreements to resell ("Reverse repos") are accounted under "Receivables from reverse repurchase agreements" in the balance sheet. The difference between the purchase and resell price determined by these repurchase agreements is accrued evenly over the life of repurchase agreements using the "Effective interest method".

The Bank has no securities lending transactions.

XI. EXPLANATIONS ON PROPERTY AND EQUIPMENT HELD FOR SALE PURPOSE AND RELATED TO DISCONTINUED OPERATIONS:

Property and equipment held-for-sale consist of tangible assets that were acquired due to non-performing receivables, and are accounted in the financial statements in accordance with the "Communiqué Regarding the Principles and Procedures for the Disposals of Immovables and Commodities Acquired due to Receivables and for Trading of Precious Metal" published in the Official Gazette dated 1 November 2006, no.26333.

The Bank has no discontinued operations.

XII. EXPLANATIONS ON GOODWILL AND OTHER INTANGIBLE ASSETS:

The Bank has no goodwill.

Intangible assets are measured at cost on initial recognition and any directly attributable costs of setting the asset to work for its intended use are included in the initial measurement. Subsequently, intangible assets are carried at historical costs after the deduction of accumulated depreciation and the provision for value decreases.

Intangibles are amortized over three to five years (their estimated useful lives) using the straight-line method. The useful life of the asset is determined by assessing the expected useful time of the asset, technical, technological and other kinds of wear and tear and all required maintenance expenses necessary to utilize the economic benefit from the asset.

XIII. EXPLANATIONS ON PROPERTY AND EQUIPMENT:

Property and equipment is measured at its cost when initially recognized and any directly attributable costs of setting the asset in working order for its intended use are included in the initial measurement. Subsequently, property and equipment is carried at cost less accumulated depreciation and provision for value decrease.

Depreciation is calculated over the cost of property and equipment using the straight-line method over estimated useful lives. The estimated useful lives are stated below:

Buildings	50 years
Machinery, furniture, fixtures and vehicles	5 years

The depreciation charge for items remaining in the property and equipment for less than an accounting period at the balance sheet date is calculated in proportion to the period the item will remain in property and equipment.

Where the carrying amount of an asset is greater than its estimated "Net realizable value amount", it is written down to its "Net realizable value amount" and the impairment loss is charged to the income statement.

Gains and losses on the disposal of property and equipment are determined by deducting the net book value of the property and equipment from its sales revenue.

Expenditures for the repair and renewal of property and equipment are recognized as expense. The capital expenditures incurred in order to increase the capacity of the tangible asset or to increase the future benefit of the asset are capitalized on the cost of the tangible asset. Capital expenditures include the cost components that increase the useful life, or the capacity of the asset, increase the quality of the product or decrease its costs.

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

XIV. EXPLANATIONS ON LEASING TRANSACTIONS:

Assets acquired under finance lease agreements are capitalized at the inception of the lease at the "Lower of the fair value of the leased asset or the present value of the lease installments that are going to be paid for the leased asset". Leased assets are included in the property and equipment and depreciation is charged on a straight-line basis over the useful life of the asset. If there is impairment in value of the leased asset, an impairment is recognized. Liabilities arising from the leasing transactions are included in "Finance lease payables" in the balance sheet. Interest and foreign exchange expenses regarding lease transactions are charged to the income statement. The Bank does not provide financial leasing services as a "Lessor".

Transactions regarding operational lease agreements are accounted on an accrual basis in accordance with the terms of the related contracts.

XV. EXPLANATIONS ON PROVISIONS AND CONTINGENT LIABILITIES:

Provisions and contingent liabilities are accounted in accordance with the "Turkish Accounting Standard for Provisions, Contingent Liabilities and Contingent Assets" ("TAS 37").

Provisions are recognized when the Bank has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. A provision for contingent liabilities arising from past events should be recognized in the same period of occurrence in accordance with the periodicity principle.

A liability is recognized as a contingent liability where a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of more than one events not wholly within the control of the Bank; or a present obligation that arises from past events but it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability and disclosed in the footnotes.

XVI. EXPLANATIONS ON CONTINGENT ASSETS:

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the entity. Contingent assets are not recognized in financial statements since this may result in the recognition of income that may never be realized. Contingent assets are disclosed where an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the financial statements in which the change occurs.

XVII. EXPLANATIONS ON OBLIGATIONS RELATED TO EMPLOYEE RIGHTS:

a. Employment termination benefits and vacation rights:

Obligations related to employment termination and vacation rights are accounted for in accordance with "Turkish Accounting Standard for Employee Rights" ("TAS 19").

Under the Turkish Labor Law, the Bank and its subsidiaries operating in Turkey are required to pay a specific amount to the employees who have retired or whose employment is terminated other than the reasons specified in the Turkish Labor Law. According to the related regulation, the Bank is obliged to pay termination benefits for employees who retire, quit for their military service obligations, who have been dismissed as defined in the related regulation or who have completed at least one year of service. The reserve for employment termination benefits represents the present value of the estimated total reserve for the future probable obligation of the Bank arising from this liability. In accordance with TAS 19, actuarial gains and losses are recognized in equity.

b. Retirement rights:

The Bank's personnel are members of the "Akbank T.A.Ş. Personnel Pension Fund Foundation" ("Pension Fund") established in accordance with the Social Security Law numbered 506, article No.20. The financial statements of the Pension Fund have been audited as of year ends by an independent actuary in accordance with the 38th article of the Insurance Supervisory Law and the "Actuarial Regulation" based on the same article.

Temporary 23rd article paragraph ("the paragraph") 1 of the Banking Law No 5411 published in the Official Gazette no. 25983 dated 1 November 2005 envisaged that Banks would transfer their pension funds to the Social Security Institution ("SSI") within three years following the publication date of the Banking Law, and regulated the principles of this transfer. The first paragraph of the related article was rescinded as from the 31 March 2007, the publication date of the decision of the Constitutional Court dated 22 March 2007. The reasoned decree regarding the rescission of the mentioned paragraph was published in the Official Gazette numbered 26731, dated 15 December 2007.

Following the publication of the reasoned decree of the Constitutional Court, Turkish Grand National Assembly commenced to work on a new law regarding the transfer of the members of funds to the Social Security Institution; the related articles of the Social Security Law ("New Law") numbered 5754 regarding the transfer of the funds, were ratified by the TGNA General Meeting on 17 April 2008 and came into effect following the publication in the Official Gazette numbered 26870, dated 8 May 2008.

The main opposition party had appealed to the Constitutional Court for the cancellation of some of the articles of the New Law including transfer of the Funds to the SSI on 19 June 2008. The Constitution Court has dismissed the appeal with the decision taken in the meeting dated 30 March 2011. The reasoned decision has been published in the Official Gazette numbered 28156 dated 28 December 2011.

The New Law was requiring that present value of post-employment benefits at the transfer date shall be calculated by a commission consisting of the representatives of SSI, Ministry of Finance, Undersecretariat of Treasury, Undersecretariat of State Planning Organization, BRSA, SDIF and banks and funds, by using a technical discount rate of 9,8 percent taking into consideration the transferrable contributions and payments of the funds including any monthly payment differences paid by the funds above the limits within the framework of SSI regulations. Accordingly the transfer required by the New Law was to be completed until 8 May 2011. According to the decision of the Council of Ministers published on the Official Gazette dated 9 April 2011 no. 27900, the time frame for related transfer has been extended for two years. Within the postponement right granted to the Council of Ministers through the change in the first clause of the 20th provisional article of the "Social Insurance and General Health Insurance Law no. 5510" published on the Official Gazette no. 28227 dated 8 March 2012, the transfer process has been postponed for one more year with the decision of the Council of Ministers published on the Official Gazette no. 28987 dated 30 April 2014. The Council of Ministers has been authorized to determine the transfer date in accordance with the last amendment in the first paragraph of the 20th provisional article of Law No.5510 implemented by the Law No. 6645 on Amendment of the Occupational Health and Safety Law and Other Laws and Decree Laws published in the Official Gazette dated 23 April 2015 and numbered 29335.

According to the New Law, following the transfer of the members of the fund to the SSI, the funds and institutions will continue to provide the non-transferrable social benefits and payments which are included in the articles of association of the fund.

With respect to that, according to the technical balance sheet report as at 31 December 2014 prepared considering the related articles of the New Law regarding the transferrable benefit obligations for the non-transferrable social benefits and payments which are included in the articles of association, the Fund has no technical or actual deficit which requires a provision. Since the Bank has no legal right to hold the present value of any economic benefits available in the form of refunds from Pension Fund or reductions in future contributions to Pension Fund, no asset is recognized in the Bank's financial statements.

Additionally, the Bank management is of the opinion that the possible obligation amount to arise during and after the transfer to be made within the framework described above will be at a reasonable level that can be met by the Fund's assets and will not bring any additional burden for the Bank.

XVIII. EXPLANATIONS ON TAXATION:

a. Current tax:

In Turkey, corporate tax rate is 20%. Corporate tax is calculated on the total income of the Bank after adjusting for certain disallowable expenses, tax-exempt income and other allowances. No further tax is payable unless the profit is distributed.

Dividends paid to non-resident corporations, which have a place of business in Turkey or are resident corporations, are not subject to withholding tax. Otherwise, dividends paid are subject to withholding tax at the rate of 15%. An increase in capital via issuing bonus shares is not considered as profit distribution and thus does not incur withholding tax.

Corporations are required to pay advance corporate tax quarterly at a rate of 20% on their corporate income. Advance tax is declared by the 14th day and paid by the 17th day of the second month following each calendar quarter end. Advance tax paid by corporations which is for the current period is credited against the annual corporation tax calculated on their annual corporate income in the following year. Despite the offset, if there is temporary prepaid tax remaining, this balance can be refunded or used to offset any other financial liabilities to the government.

A 75% portion of the capital gains derived from the sale of equity investments and immovable properties held for at least two years is tax exempt, if such gains are added to paid-in capital or held in a special fund account under liability for five years.

Under the Turkish Corporate Tax Law, losses can be carried forward to offset against future taxable income for up to five years. Tax losses cannot be carried back to offset profits from previous periods.

In Turkey, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns until the 25th day of the following fourth month after the closing of the accounting year to which they relate. Tax returns are open for five years from the beginning of the year following the date of filing during which time period the tax authorities have the right to audit tax returns, and the related accounting records on which they are based, and may issue re-assessments based on their findings.

Current tax, related to items recognized directly in equity is also credited or charged directly to equity.

b. Deferred tax:

The Bank calculates and accounts for deferred income taxes for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in these financial statements in accordance with "Turkish Accounting Standard for Income Taxes" ("TAS 12") and the related decrees of the BRSA concerning income taxes. In the deferred tax calculation, the enacted tax rate, in accordance with the tax legislation, is used as of the balance sheet date.

Deferred tax liabilities are recognized for all resulting temporary differences whereas deferred tax assets resulting from temporary differences are recognized to the extent that it is probable that future taxable profit will be available against which the deferred tax assets can be utilized. Deferred tax asset is not provided over provisions for possible risks and general loan loss provisions according to the circular of BRSA numbered BRSA.DZM.2/13/1-a-3 and dated 8 December 2004.

Deferred tax assets and liabilities are presented as net in the financial statements.

Deferred tax, related to items recognized directly in equity is also credited or charged directly to equity.

XIX. EXPLANATIONS ON BORROWINGS:

Debt instruments with different characteristics such as syndicated and securitized borrowings and post-financing obtained from foreign financial institutions, marketable securities issued in domestic and foreign markets and money market borrowings are major funding source of the Bank. Mentioned borrowings are carried initially at acquisition cost and subsequently recognized at the discounted value calculated using the "Effective interest method".

XX. EXPLANATIONS ON ISSUANCE OF SHARE CERTIFICATES:

There is no share certificate issuance in 2015.

XXI. EXPLANATIONS ON AVALIZED DRAFTS AND ACCEPTANCES:

Avalized drafts and acceptances shown as liabilities against assets are included in the off-balance sheet commitments.

XXII. EXPLANATIONS ON GOVERNMENT GRANTS:

As of 30 September 2015 and 31 December 2014, there is no government grant for the Bank.

XXIII. EXPLANATIONS ON SEGMENT REPORTING:

An operating segment is a component of an entity:

- that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity),
- whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and
- for which discrete financial information is available.

Reporting according to the operational segment is presented in Note XIII of Section Four.

XXIV. PROFIT RESERVES AND PROFIT APPROPRIATION:

Retained earnings as per the statutory financial statements other than legal reserves are available for distribution, subject to the legal reserve requirement referred to below.

Under the Turkish Commercial Code, legal reserves consist of first legal reserve and second legal reserve. First legal reserve, appropriated at the rate of 5%, until the total reserve is equal to 20% of issued and fully paid-in share capital. Second legal reserve, appropriated at the rate of at least 10% of distributions in excess of 5% of issued and fully paid-in share capital, but Holding companies are not subject to such transaction. According to the Turkish Commercial Code, legal reserves can only be used to compensate accumulated losses and cannot be used for other purposes unless they exceed 50% of paid-in capital.

The Ordinary General Assembly Meeting of the Bank was held on 26 March 2015. In the Ordinary General Assembly, it was decided to distribute a TL 569.600 cash dividend over the TL 3.159.678 net income from 2014 operations to the Bank's shareholders. It was also resolved in the General Assembly to transfer TL 4.505 to special funds account under other capital reserves, to allocate TL 36.960 as legal and TL 2.548.613 as extraordinary reserves.

XXV. EARNINGS PER SHARE:

Earnings per share disclosed in the income statement are calculated by dividing net profit for the year by the weighted average number of shares outstanding during the period concerned.

	Current Period	Prior Period
	30 September 2015	30 September 2014
Net Profit for the Year	2.085.530	2.265.345
Average Number of Issued Common Shares (Thousand)	400.000.000	400.000.000
Earnings Per Share (Amounts presented as full TL)	0,00521	0,00566

In Turkey, companies can increase their share capital by making a pro-rata distribution of shares ("Bonus shares") to existing shareholders from retained earnings. For the purpose of earnings per share computations, the weighted average number of shares outstanding during the year has been adjusted in respect of bonus shares issued without a corresponding change in resources by giving them a retroactive effect for the year in which they were issued and for each earlier period. In case bonus shares are distributed after the balance sheet date but before the preparation of the financial statements, earnings per share is calculated considering the new number of shares.

No bonus shares issued in 2015 (2014: (-)).

XXVI. RELATED PARTIES:

Parties defined in Article 49 of the Banking Law No.5411, Bank's senior management and Board Members are deemed as related parties. Transactions regarding related parties are presented in Note VI of Section Five.

I. EXPLANATIONS ON CAPITAL ADEQUACY RATIO:

a. The Bank's capital adequacy ratio, calculated in accordance with the "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" which became effective as of 1 July 2012, is % 13,72 (31 December 2014: 15,16%). This ratio is well above the minimum ratio required by the legislation.

b. Capital adequacy ratio has been calculated in accordance with the "Regulation on Measurement and Assessment of Capital Adequacy of Banks", "Credit Risk Mitigation Techniques" and "Calculation of Risk-Weighted Amounts for Securitizations" Communiqués that have been published in Official Gazette no. 28337 on 28 June 2012 and became effective as of 1 July 2012 and "Regulation on Equity of Banks" that has been published in Official Gazette no. 26333 on November 1, 2006.

Capital adequacy ratio is calculated based on total capital requirements needed for credit risk, market risk and operational risk. Credit risk is calculated by holding risk-weighted assets and non-cash loans subject to risk-weights in the relevant legislation and taking risk mitigation techniques into account; the standard method is used to calculate market risk and the basic indicator approach is used to calculate operational risk.

The following tables show the details of risk-weighted assets which constitute the basis for the Bank's capital adequacy ratio and Bank's equity calculation.

g. Information about debt instruments that will be included in total capital calculation: None.

II. EXPLANATIONS ON CREDIT RISK:

Credit risk is the risk that the counterparties may be unable to meet the terms of their agreements. This risk is monitored by reference to credit risk ratings and managed by limiting the aggregate risk to any individual counterparty, group of companies and industry. Credit risks are determined for each individual customer, enterprise, business group and risk groups separately. While determining credit risk, criteria such as the customers' financial strength, commercial capacities, sectors, geographic areas and capital structure are evaluated. Analyses of the financial position of the customers are based on the statements of account and other information in accordance with the related legislation. Previously determined credit limits are constantly revised according to changing conditions. The type and amount of collateral and guarantees to be obtained are specified on a customer basis during the determination of credit limits.

During loan extensions, limits determined on a customer and product basis are essentially followed up; information on risk and limits is closely monitored.

For daily treasury operations limit allocation and follow-up is performed by the Treasury.

Credit worthiness of loan and other receivable debtors are watched regularly and in line with related regulations. In case of an increase in credit debtor's risk level credit limits are re-determined or additional guarantee is taken. For new credit accounts, account follow-up documents are taken in accordance with the related regulation.

III. EXPLANATIONS ON MARKET RISK:

The risk principles, policies and risk limits related to the management of market risk are approved by the Board of Directors and reviewed on a regular basis. The Bank's Senior Management performs day to day management of the market risk in accordance with the limits assigned by the Board of Directors. The Bank is exposed to market risk as a result of fluctuations in foreign exchange rates, interest rates, and market prices of stocks. Exchange rate risk and interest rate risk are evaluated as the two most important components of market risk. The Bank engages in derivative transactions for hedge purposes when found necessary.

Market risk is calculated by two different methods, namely the "inherent model" and the "standard method". According to inherent model market risk is measured by Value at Risk ("VaR") approach which takes into account different risk factors. VaR calculations use variance-covariance, historical simulation and Monte Carlo simulation methods. The software used can perform calculations with an advanced yield curve and volatility models. The VaR model is based on the assumptions of 99% confidence interval and a 10-day holding period. VaR analyses are performed on a daily basis and reported to the Senior Management. VaR analyses are also used as risk and limit management instrument for trading transactions. The limits are reviewed periodically according to market conditions and the application of specified limits is subject to authority restrictions and therefore the control effectiveness is increased. VaR analyses are supported with scenario analyses and stress tests, and take into consideration the effects of low-probability events which have significant impact and the effects of market fluctuations. Retrospective tests of the model outputs are performed regularly. The standard method is used for the legal reporting.

The following table indicates the details of the market risk calculation as of 30 September 2015, in accordance with the Market Risk Calculation principles pursuant to the Part 2 of the Second Section of the "Regulation on Measurement and Assessment of Capital Adequacy of Banks" published in the Official Gazette no. 28337 on 28 June 2012.

IV. EXPLANATIONS ON CURRENCY RISK

The difference between the Bank's foreign currency denominated and foreign currency indexed assets and liabilities is defined as the "Net Foreign Currency Position" and is the basis of currency risk. Foreign currency denominated assets and liabilities, together with purchase and sale commitments, give rise to foreign exchange exposure. The Bank keeps the foreign exchange exposure amount within the limits set by the EMRC. The Board, taking into account the recommendations by the EMRC, sets a limit for the size of a foreign exchange exposure, which is closely monitored by ALCO.

Those limits are individually determined and followed for both the net overall foreign currency position and for the foreign exchange exposure. Derivative financial instruments like forward foreign exchange contracts and currency swaps are used as tools for foreign exchange exposure management.

The Bank's foreign exchange bid rates as of the date of the financial statements and for the last five days prior to that date are presented below:

	USD	EURO	Yen
Balance Sheet Evaluation Rate	TL 2,9800	TL 3,3435	TL 2,4740
1.Day bid rate	TL 3,0433	TL 3,4212	TL 2,5340
2.Day bid rate	TL 3,0464	TL 3,4057	TL 2,5288

Information related to Bank's Currency Risk: (Thousands of TL)

The table below summarizes the Bank's exposure to foreign currency exchange rate risk, categorized by currency. Foreign currencies indexed assets, classified as Turkish lira assets according to the Uniform Chart of Accounts are considered as foreign currency assets for the calculation of Net Foreign Currency Position. In accordance with the "Communiqué on Calculation of Foreign Currency Net Position/Capital Standard Ratio by banks in stand-alone and consolidated basis"; in assets trading derivative financial assets, hedging derivative financial assets, deferred tax assets, prepaid expenses, in liabilities general loan loss provision, deferred tax liability, trading derivative financial liabilities, hedging derivative financial liabilities and shareholders' equity are excluded in the currency risk calculation. Therefore, there are differences between the amounts of foreign currency denominated assets and liabilities demonstrated on the table below and the amounts on the balance sheet. The Group's real position, both in financial and economic terms, is presented in the table below:

V. EXPLANATIONS ON INTEREST RATE RISK:

"Interest Rate Risk" can be defined as the impact of interest rate changes on interest-sensitive asset and liability items of both on and off-balance sheets of the Group. The EMRC sets limits for the interest rate sensitivity of on and off-balance sheet items and the sensitivity is closely monitored and reported weekly. In the case of high market fluctuations, daily transaction based reporting and analyses are made.

The Bank manages the interest rate risk on a portfolio basis and tries to minimize the risk effect on the profitability, financial exposure and cash flows by applying different strategies. Basic methods such as using fixed or floating interest rates for different portfolios and maturities, setting the fixed margin in floating rates, or varying the rates for the short or long-term positions are applied actively.

a. Interest rate sensitivity of assets, liabilities and off-balance sheet items based on repricing dates:

c. Interest rate risk related to banking book:

Interest rate risk for all banking transactions outside the trading portfolio are followed under interest rate risk related to the banking book. Interest rate risk related to the trading portfolio is followed under market risk.

ALCO performs daily management of interest rate risk in accordance with the risk limits set by the Executive Risk Committee in relation to interest rate sensitivities of the banking book. ALCO meetings are held on a weekly basis.

In addition to interest rate sensitivities measured and reported weekly, daily and transaction-based analyses are also performed when significant fluctuations occur in markets.

Repricing term mismatch and duration mismatch analyses, net economic value change analyses under different interest rate stress scenarios and income simulations are used for interest rate risk management. Repricing risk, yield curve risk, basis risk and optionality are considered under interest rate risk scope.

The interest rate risk arising from banking book is calculated and reported on a monthly basis according to "Regulation on Measurement and Evaluation of Interest Rate Risk in Banking Accounts with Standard Shock Method" published in the Official Gazette no. 28034 on 23 August 2011.

Calculation of the interest rate risk derived from banking books is presented below:

Currency	Applied Shock (+/- x basis points)	Gains / Losses	Gains / Shareholders' Equity - Losses/ Shareholders' Equity

VI. EXPLANATIONS ON EQUITY SECURITIES POSITION RISK DERIVED FROM BANKING BOOKS:

The Bank doesn't have any subsidiaries and affiliates that are traded on the "BIST".

VII. EXPLANATIONS ON LIQUIDITY RISK:

The Bank manages liquidity risk through broad deposit base, strong capital structure and diversified foreign borrowing facilities. The Bank maintains additional resources to provide liquidity when necessary through allocated limits in Central Bank of Turkey, BIST Money Market, ISE Settlement and Custody Bank Money Market and other banks, and through liquid marketable securities portfolio. The Bank acts conservative on foreign currency liquidity management and in order to meet liquidity needs completely, maintains adequate reserves.

Short-term funding needs are provided by using deposits. The Bank's broad deposit base and high ratio of core deposit enable long-term funding. Long-term placements can be provided by means of long-term foreign funds.

Liquidity coverage ratios are calculated weekly and monthly starting from 1 January 2015 as per "Regulation on Liquidity Coverage Ratio Calculation" published in the Official Gazette no. 28948, dated 21 March 2014. Liquidity coverage ratios should be at least 40% for foreign currency denominated assets and liabilities and 60% for total assets and liabilities for 2015. Liquidity coverage ratios for the third quarter of 2015 are as follows:

VIII. EXPLANATIONS ON SECURITIZATION POSITIONS:

None.

IX. EXPLANATIONS ON CREDIT RISK MITIGATION TECHNIQUES:

The Bank applies the Comprehensive Financial Collateral Techniques explained in "Credit Risk Mitigation Techniques Communiqué" published in Official Gazette no. 28337 on June 28, 2012. In application of the method, volatility adjusted values of financial guarantees and credits are calculated with the standard volatility adjustment approach and adjusted amounts are deducted from credit risk.

The Bank does not utilize balance sheet and off-balance sheet netting, guarantees and credit derivatives in credit risk mitigation, but financial collaterals fulfilling relevant requirements are taken into account. Basic financial covenants considered in the calculation of Bank's capital adequacy are foreign currency and TL deposit pledges.

X. EXPLANATIONS ON RISK MANAGEMENT TARGET AND POLICIES:

Effective risk management constitutes one of the most important competitive strength of the Bank. Risk management system is assessed as a critical process which includes all units starting at the Board of Directors level. General strategies regarding Bank's risk management are given below:

- Effective management of risks within the Bank's risk profile based on materiality; implementing a centralized risk framework that includes all major risk areas.
- Managing existing and potential risks from the beginning through forward looking risk strategies, policies and procedures, models and parameters,
- Applying a risk-focused management approach in the strategic decision making process,
- Complying with all national risk management requirements, where the Bank operates.

The Bank's Board of Directors has the ultimate responsibility for setting-up and monitoring the efficiency of such a risk management system. The Board of Directors fulfills its monitoring responsibility through the Auditing Committee, the Executive Risk Committee, the Credit Committee and other related intermediary committees and by means of regular risk, control and audit reporting system.

AKBANK T.A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AT 30 SEPTEMBER 2015

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

The Board of Directors approves and regularly reviews Bank's main risk approach, risk principles and policies which are initially discussed and decided by the Executive Risk Committee. The Board of Directors also determines Bank's risk appetite by risk limits taking market conditions and Bank's risk taking capacity into consideration. Risk limits are made up of regulatory and internal limits on the basis of risk types.

Bank's Senior Management is responsible to the Bank's Board of Directors that daily activities are executed within the risk management procedures and risk limits determined by the Board of Directors and that risk management system operates in effective and efficient manner. The Internal Audit, the Internal Control and the Risk Management Departments which directly report to the Board of Directors operate in coordination with the business units of the Bank. In this scope, it is also Senior Management's responsibility to take necessary measures in order to resolve identified weaknesses, deficiencies and errors stated in the reports of internal and external audits, internal control and risk management.

Locally and internationally accepted risk models and parameters are used in the identification, measurement and monitoring of risks within the scope of risk management. The Bank strives continuously for development and improvement of internal methods and models. Forward looking risk reports prepared through regular and close monitoring of the market developments are made available for the Senior Management and the Board of Directors. In order to analyze the potential risks that the Bank may be exposed in extreme cases, various scenario analyses are performed and contingency plans are prepared. The Bank's internal capital adequacy assessment process ("ICAAP") has been established and the ICAAP has been performed parallel to the annual budget process on an annual basis. Moreover, various risk mitigation techniques are utilized to limit and provide protection against risks the Bank is exposed to. The effectiveness and efficiency of the risk mitigation techniques are regularly monitored.

XI. EXPLANATIONS ON THE ACTIVITIES CARRIED OUT ON BEHALF AND ACCOUNT OF OTHER PERSONS:

The Bank carries out trading, custody, management and consulting services on behalf of customers and on their account. Details of these transactions are provided in the off-balance sheet table. The Bank has no trust transactions

XII. EXPLANATIONS ON HEDGE TRANSACTIONS:

The Bank hedges its TL and foreign denominated fixed rate financial assets with cross currency swaps and interest rate swaps. Within the scope of fair value hedge, fair value changes of hedging instrument and hedged item are accounted in the income statement. As long as the hedge relationship is effective, fair value change of the hedged item is disclosed together with its related asset in the balance sheet for TL denominated fixed rate mortgage loans. Fair value changes which have already been booked in equity, have been reclassified from equity to income statement for TL and FC denominated fixed rate available-for-sale financial assets.

Prospective tests are performed at the inception of the hedge relationships and both prospective and retrospective tests are performed at each reporting period-end regularly by using "Dollar off-set method". In this method, changes in the fair value of the hedged item and changes in the fair value of the hedging instruments between the designation date and each reporting period-end are compared and effectiveness ratio is calculated. In the determination of the fair values of hedging instruments and hedged item, market yield curves are used. Hedge accounting principles are applied by assessing the calculated effectiveness ratio within the scope of TAS 39.

When the hedging instrument expires, is executed or sold and when the hedge relationship becomes ineffective or is discontinued as a result of the hedge relationship being revoked;

- The hedging gains and losses that were previously recognized under equity are transferred to profit or loss when the cash flows of the hedged item are realized,
- Adjustments made to the carrying amount of the hedged item are transferred to profit and loss with straight line method for portfolio hedges or with effective interest rate method for micro hedges.

In case the hedged item is derecognized, hedge accounting is discontinued and within context of fair value hedge accounting, adjustments made to the value of the hedged item are accounted in income statement.

In accordance with TAS 39, the replacement or rollover of a hedging instrument into another hedging instrument is not an expiration or termination if such replacement or rollover is part of the entity's documented hedging strategy.

The Bank also applies fair value hedge against currency risk resulting from investments abroad. As long as the subject fair value hedge transaction is effective, fair value changes of the hedged item are reflected to income statement.

XIII. EXPLANATIONS ON BUSINESS SEGMENTS:

The Bank operates in five main business segments including retail banking, commercial banking and SME banking, corporate banking, treasury activities, private banking and international banking. These segments have been determined considering customer segments and branch network providing services to customers in accordance with the Bank's organizational structure.

The profitability system generating segment information provides profitability information on the basis of account customer, customer relationship manager, branch segment and product. This information is made available to the branch and Head Office personnel through a web-based management reporting system.

In scope of retail banking, the Bank offers a variety of retail services such as deposit accounts, consumer loans, commercial installment loans, credit cards, insurance products and asset management services. The retail banking products and services also include bank cards, investment funds trading, automatic payment services, foreign currency trading, safe deposit box rentals, cheques, money transfers, investment banking, telephone and internet banking.

Corporate banking and commercial banking and SME banking provide financial solutions and banking services to large, medium and small size corporate and commercial customers. The products and services offered to corporate and commercial customers include TL and foreign currency denominated working capital loans financing for investments, foreign trade financing, derivative instruments for hedging purposes of foreign currency and interest risk, letters of credit, foreign currency trading, corporate finance services and deposit and cash management services. In addition, the Bank provides timely and permanent solutions for corporate customers' working capital management, delivers cash management services tailored based on customers' requests that include collection and payment services and liquidity and information management. Project finance loans are provided within the context of investment banking activities.

The Treasury Unit conducts TL and FC spot and forward transactions, treasury bonds, government bonds, Eurobond and private sector bond transactions and also derivative trading activities within determined limits. These transactions are performed according to the Bank's requirements. Furthermore, Treasury Unit also carries out marketing and pricing activities of treasury products for customers and branch network.

Private banking serves the members of the upper-income groups who have expectations for upper-class service quality both in banking and investment transactions.

International Banking activities are managed by International Banking Unit. The Bank provides services for foreign trade financing, foreign currency and TL clearances and money transfers through agent financial institutions. The international banking unit serves in fundamental areas such as providing long-term funding opportunities, creating funding facility at lower prices that fully reflect country risk, diversifying funding resources and creating a base of international investors for that purpose.

l. **Information on deferred tax asset:**

As of 30 September 2015, deferred tax asset of the Bank is TL 164.401 (31 December 2014: TL 11.649). Provisional differences subject to deferred tax calculation result from mainly the differences between the book values and tax values of fixed assets, financial assets and liabilities and provision for employee rights.

Deferred tax assets and liabilities which are accounted for the temporary differences arising between applicable accounting policies and valuation principles and tax legislation are netted-off and accounted. There are no carry forward tax losses that can be used as deductions for the tax calculation. An explanation about the net deferred tax liability is given in Note II-i-2 of Section Five.

The liabilities providing the funding sources of the Bank are deposits, borrowings, marketable securities issued and money market borrowings. Deposits are the most important funding source of the Bank and the diversification of these deposits by number and type of depositors with a stable structure does not create any risk concentration. The borrowings are composed of funds such as syndicated and securitized borrowings and post-financing obtained from different financial institutions with different maturity-interest structures and characteristics. There is no risk concentration in any of the funding sources of the Bank.

2. Information on reserve for employment termination benefits:

Under the Turkish Labor Law, the Bank is required to pay termination benefits to each employee who has completed at least one year of service and whose employment is terminated without due cause, is called up for military service, dies or who retires.

The amount payable consists of one month's salary limited to a maximum of TL 3.828,37 (in full TL amount) (31 December 2014: TL 3.438,22 (in full TL amount)) for each year of service. This liability is legally not funded and there is no funding requirement.

The reserve has been calculated by estimating the present value of the future probable obligation of the Bank arising from the retirement of its employees. TAS 19 requires actuarial valuation methods to be developed to estimate the enterprise's obligation for such benefits. Accordingly, the following actuarial assumptions were used in the calculation of the total liability:

	Current Period	Prior Period
	30 September 2015	31 December 2014
Discount Rate (%)	3,62	3,62
Rate for the Probability of Retirement (%)	93,94	93,94

The principal actuarial assumption is that the current maximum liability will increase in line with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the effects of future inflation. The amount of TL 3.828,37 (1 January 2015: TL 3.541,37) effective from 1 September 2015 has been taken into consideration in calculating the reserve for employee termination benefits.

4. Information on share capital increases from capital reserves during the current period: None.

5. Information on capital commitments, the purpose and the sources until the end of the fiscal year and the subsequent interim period: None.

6. The effects of anticipations based on the financial figures for prior periods regarding the Bank's income, profitability and liquidity, and possible effects of these future assumptions on the Group's equity due to uncertainties at these indicators;

The Bank has been continuing its operations with high profitability and has been retaining most of its net profit in the equity, either by increasing its capital or transferring it into reserves. On the other hand, only a small part of the equity is allocated to investment such as associates and fixed assets, thus giving a chance for considerably high free capital which provides funds for liquid and interest bearing assets. Considering all these factors, the Bank continues to its operations with strong shareholders' equity.

7. Information on privileges given to shares representing the capital: None.

As stated in Section Three disclosure VII, the Bank has inflation indexed (CPI) government bonds in its available-for sale and held-to-maturity portfolios with semi-annual fixed real coupon rates and a maturity of 5 to 10 years. As disclosed in 'Inflation Indexed Bonds Manual' published by Turkish Treasury, reference index used for the actual payments is determined based on the inflation rates of two months before. The Bank determines the estimated inflation rates in line with this information on interest income received from investments in associates and subsidiaries. The Bank determines the estimated inflation rates in line with this. In this context, as of 30 September 2015, valuation of such assets is made according to estimated annual inflation rate of 7%. If valuation of these securities indexed to the CPI had been done by the reference index valid through 30 September 2015, the Bank's Marketable securities valuation differences would be increased by TL 37 million and net profit would be decreased by TL 54 million to TL 2.032 million.
